## TABLETOP VACUUM - SEALING BAR 450 MM - PROCESS TRACKING AND LABELLER

TABLETOP VACUUM MACHINE

## DESCRIPTION

With the new **MVS XP** line the vacuum inside the package can be traced: it is a new and revolutionary concept for the internal vacuum, an exclusive innovation in the minipack@-torre style.

In fact, some models in the range of **chamber vacuum sealers** offer the possibility to obtain for each packing operation a label in which the essential information of the machining is printed.

The control panel installed on these machines, at the forefront of the technology of the food industry, is a new concept. The display allows a quick setting of operations thanks to its interactivity and ease of navigation and helps the user to program the technical and assistance interventions.

The whole new line of vacuum packaging machines XP is CE/ETL/NSF Certified.
